<b>OBSERVATIONS &amp; RECOMMENDATION:</b> Following are the observations made from the analysis of Feedback and recommendatons thereof:
1. Job-oriented/Soft Skilled/Vocational Courses are inadequate and thus recommended to introduce these or other need-based courses.
2. Considering the challenges of the 21st Century world, teachers are to be more equipped with soft skill so that they can make the classes more effective and innovative.
3. More initiative should be taken for counselling and conducting remedial classes
4.It is strongly recommended that more initiatives should be taken for sports, cultural and extra-curricular actives for students.
5. To save energy, solar system should be installed.
