

## HAJI ANFAR ALI COLLEGE

### Green Campus, Energy and Environment Policy

Green Campus, Energy and Environment Policies will develop exciting new co-curricular and extracurricular practices that encourage students to take the lead in creating positive change.

Objectives of Green Campus, Energy, and Environment Policy:

- a. To reduce energy consumption through the implementation of energy-efficient technologies and practices.
- b. To promote awareness among students, faculty, and staff about energy conservation and responsible energy use.
- c. To conserve water resources through rainwater harvesting,
- d. To educate the college community about water conservation practices and encourage responsible water usage.
- e. To encourage sustainable transportation methods such as walking, cycling, and carpooling among students, faculty, and staff.
- f. To provide infrastructure and facilities that support eco-friendly commuting options.
- g. To maintain and enhance green spaces on campus, promoting biodiversity and creating habitats for local flora and fauna.
- h. To prioritize the planting of native plants and trees to conserve water resources and support local ecosystems.
- i. To integrate environmental education into the college curriculum, fostering environmental responsibility among students.
- j. To organize awareness campaigns, seminars, workshops, and guest lectures to engage the college community and promote environmental awareness.
- k. To collaborate with government agencies, NGOs, and local communities to address environmental challenges and implement sustainable initiatives.
- l. To continuously review and update the Green Campus, Energy, and Environment Policy to align with emerging best practices and technologies.
- m. To actively seek feedback from students, faculty, staff, and relevant stakeholders to drive positive change and ensure the policy's effectiveness.

## Initiatives of the College

### 1. Commitment to Sustainability:

Haji Anfar Ali College is committed to creating and maintaining a sustainable campus environment that promotes ecological balance, conservation of resources, and environmental responsibility.

### 2. Green Generator and Solar Energy:

a. The college will install green generators and solar panels to reduce dependency on non-renewable energy sources.

b. Energy-efficient practices will be adopted, such as turning off lights and electrical equipment when not in use.

### 3. Energy Efficiency and Conservation:

a. The college will strive to reduce energy consumption by implementing energy-efficient practices and utilizing renewable energy sources.

b. Regular energy audits will be conducted to identify energy-saving opportunities and implement effective energy management strategies.

c. Energy-efficient technologies, such as LED lighting and smart energy systems, will be adopted to minimize energy wastage.

### 4. Water Conservation:

a. The college will promote water conservation practices, including rainwater harvesting.

b. Awareness programs will be conducted to educate students, faculty, and staff about the importance of water conservation and responsible water use.

### 5. Waste Management:

a. Emphasis will be placed on reducing waste generation through awareness programs and promoting sustainable consumption habits.

### 6. Composting of Dry Leaves and Organic Waste:

a. Dry leaves and other organic waste will be collected and composted on campus to produce organic fertilizers for the college gardens.

b. Composting bins and facilities will be provided for effective waste management.

### 7. Sustainable Transportation: a. The college will encourage the use of sustainable transportation methods such as walking, cycling, among students, faculty, and staff

### 8. Biodiversity and Green Spaces:

a. Haji Anfar Ali College recognizes the importance of biodiversity and green spaces for ecological balance and student well-being.

b. The college will maintain and enhance green spaces on campus, creating habitats for local flora and fauna.
